

哈尔滨数论短课程系列

为了促进哈尔滨地区数论方向的建设与持续发展，并加强与国内外数论学者的交流与合作，我们在此推出数论短课程系列。我们将邀请国内外数论领域资深专家，就数论领域一系列基础理论进行讲学。欢迎感兴趣的师生积极参与！

—组织者：刘春晖、秦超、王珺、张毅超

第一期：岩泽理论 (Iwasawa Theory)

主讲专家：林明辉 教授（华中师范大学）

助课教师：秦超、王珺

课程时间：2022 年 8 月 8 日至 8 月 13 日

答疑时间：8 月 10 日至 8 月 13 日，上午 9:30-11:30

课程地点：哈工大理学楼 901 室

♡ **第一讲：**8 月 9 日，下午 2 点-5 点

讲授内容：We review preliminaries on the power series ring in one variable with coefficient in the p -adic ring of integers. Along the way, we establish the Weierstrass Preparation Lemma. We also describe the structure theory of finitely generated modules over such power series ring.

♡ **第二讲：**8 月 10 日，下午 2 点-5 点

讲授内容：We will prove the Iwasawa asymptotic class number formula building on the structure theory. If time permits, we shall say something on the Kummer theory over a cyclotomic \mathbb{Z}_p -extension.

♡ **第三讲：**8 月 11 日，下午 2 点-5 点

讲授内容：We review the notion of Dirichlet L -functions. This is followed a discussion of the construction of p -adic L -function attached to these Dirichlet L -functions.

♡ **第四讲：**8 月 12 日，下午 2 点-5 点

讲授内容：We formulate the Iwasawa Main Conjecture for totally real fields (which is now a theorem of Mazur-Wiles, Wiles). We then give a sketch on its applications to the study of relating special values of Dedekind zeta functions to higher K -groups.
